

# Importing into the table "order\_info"

## File to import:

File may be compressed (gzip, bzip2, zip) or uncompressed.

A compressed file's name must end in **[format].[compression]**. Example: **.sql.zip**

Browse your computer: (Max: 128MiB)

Choose File

order\_info.csv

You may also drag and drop a file on any page.

Character set of the file:

utf-8

## Partial import:

☒ Allow the interruption of an import in case the script detects it is close to the PHP timeout limit.

This might be a good way to import large files, however it can break transactions.

Skip this number of queries (for SQL) starting from the first one:

0

## Other options

☒ Enable foreign key checks

## Format

CSV

Note: If the file contains multiple tables, they will be combined into one.

## Format-specific options:

☐ Update data when duplicate keys found on import (add ON DUPLICATE KEY UPDATE)

Columns separated with:

Columns enclosed with:

Columns escaped with:

Lines terminated with:

Import these many number of rows (optional):

Column names:

Do not abort on INSERT error

**Import**
