Importing into the table "items"

File to import:

File may be compressed (gzip, bzip2, zip) or uncompressed.
A compressed file's name must end in **.[format].[compression]**. Example: **.sql.zip**

Browse your computer: (Max: 128MiB)

Choose File	items.csv

You may also drag and drop a file on any page.

Character set of the file:

utf-8

Partial import:

🔵 Allow the interruption of an import in case the script detects it is close to the PHP timeout limit.
        This might be a good way to import large files, however it can break transactions.

Skip this number of queries (for SQL) starting from the first one:

0

Other options

🔵 Enable foreign key checks

Format

CSV

Note: If the file contains multiple tables, they will be combined into one.

Format-specific options:

⚪ Update data when duplicate keys found on import (add ON DUPLICATE KEY UPDATE)

Columns separated with:

,

Columns enclosed with:

Columns escaped with:

Lines terminated with:

auto

Import these many number of rows (optional):

Column names:

publisher,name,issue,grade,price

⬤ Do not abort on INSERT error

(**Import**)
